Job Description:

We are in search of a highly skilled and motivated Civil Engineer to join our dynamic team. As a QA/QC Engineer, you will be responsible for Third Party Quality Inspection of construction work, particularly high-rise residential complexes, for a reputable infrastructure development company based in Gurgaon. Your duties will involve checking the quality of construction, verifying raw material quality, witnessing testing both on-site and in the lab, reviewing test certificates, preparing reports, coordinating with client quality teams and contractors, reviewing scheduling, witnessing casting, and overseeing various construction activities including civil finishing work. Additionally, you will be tasked with rating projects on defined parameters, suggesting areas for improvement, and ensuring a safe working environment.

Responsibilities:

- Review planning and scheduling of construction activities.
- Conduct third-party inspections on-site.
- Implement Quality Assurance and Quality Control measures.
- Review and verify test certificates.
- Inspect the quality of raw materials at the site/source and RMC plant.
- Witness on-site and lab testing.
- Identify and report discrepancies/non-conformities.
- Prepare daily, weekly, monthly, and quarterly reports.
- Analyze contractors/vendors performance and defects.
- Recommend rectifications and areas for improvement.
- Ensure personal safety and a safe working environment, reporting unsafe conditions.

This job description outlines the key responsibilities and requirements for the role of Principal Engineer / Sr. Principal Engineer QA/QC at Quality Austria Central Asia Private Limited. We are excited about the prospect of welcoming a talented individual to our team and look forward to the contributions they will make to our organization.
